

PROBLEM OF THE DAY : GEEKS FOR GEEKS

Express as Consecutive Number Sum

Difficulty: **Easy** Accuracy: **50.49%** Submissions: **12K+** Points: **2**

Given a number **n**, find whether n can be expressed as **sum** of two or more consecutive positive numbers.

Examples :

Input: n = 10

Output: true

Explanation: 10 can be expressed as 1 + 2 + 3 + 4.

Input: n = 8

Output: false

Explanation: 8 can't be expressed sum of two or more consecutive numbers.

Input: n = 24

Output: true

Explanation: 24 can be expressed as 7 + 8 + 9.

ANSWER:

```
class Solution:
```

```
    def isSumOfConsecutive(self, n: int) -> bool:
```

```
        # code here
```

```
        return (n & (n-1)) != 0
```
